20 Years of Gutmann

Innovation

from

Peugeot Basis

20 years ago we started to make design and technical changes to Peugeot Talbot cars, with many successes in competition. We outgrew our small workshops to become the World Wide Company we are today. The experiences we gained from Motorsport in the last 20 years gave us the opportunity to develop a complete design/tuning programme for Peugeot cars only available from Gutmann Automobil Technik. ... The first name in Peugeot tuning.

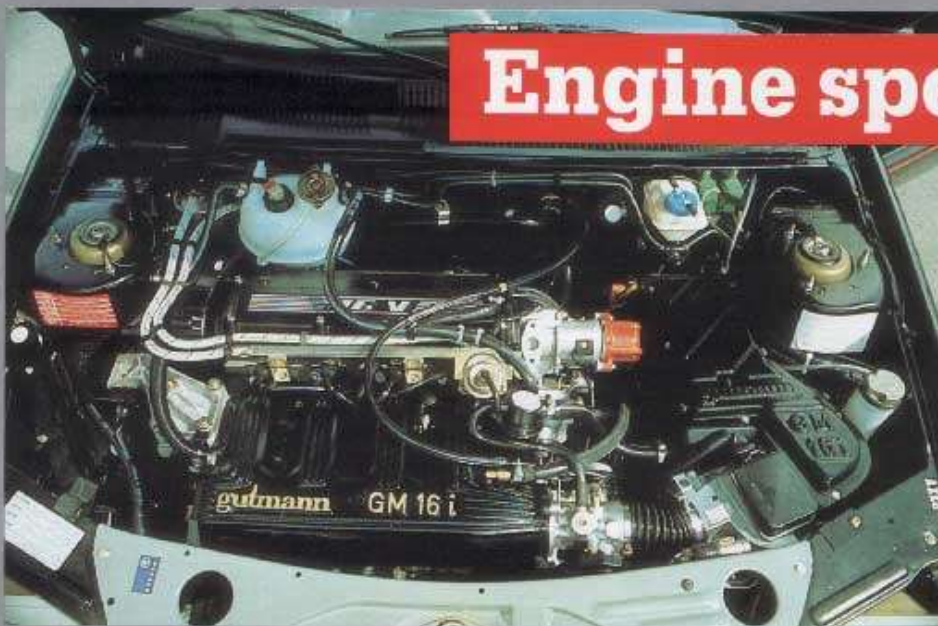

A Programme

like no others

This leaflet will give you an idea how to make your dreams reality, an individual Peugeot car for you, for more ideas and technical information see our full catalogue.

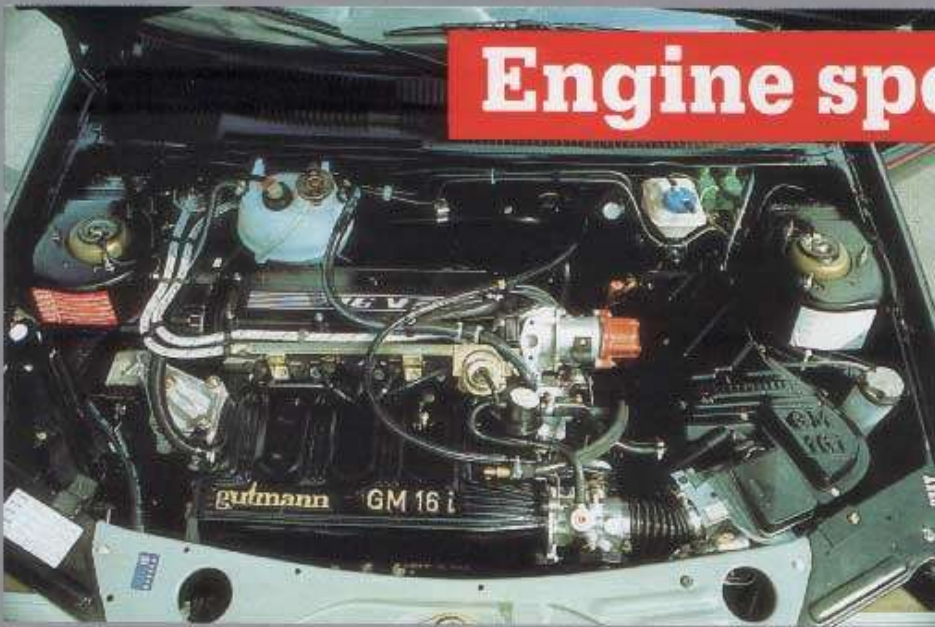

Engine specification

Successful engine tuning is only achieved with the following basic gains, improved torque curve, better top-end/mid range power characteristic and good economy for practical every day motoring. This is only gained through many years of experience. Engine conversions in different power stages are available for most Peugeot models.
